4. More information about quizzes and exams:
4.1 No password is required.
4.2. The multiple choice questions will be randomly selected by eCampus from a pool of questions that I created. Thus, these questions will not be the same for all students.
4.3. The quiz or exam will shut down once the time limit has been reached, so pay attention to the clock.
4.4. The quiz or exam will close once the deadline has been reached, even if you only just started it.
4.5. You will only see one question at a time.

5. Suggestions for time management during your exam:
5.1. I suggest setting a timer for each question, for instance:
    5.1.1. Quiz: Two minutes per question (5 questions, 10 minutes in total)
    5.1.2. Exam: One minute and 30 seconds per question (50 questions, 75 minutes in total).
    5.1.3. Final exam: Two minutes and 24 seconds per question (50 questions, 120 minutes in total).
5.2. The trick is to not hit the next/submit button until the timer has gone off, since you cannot go back to the previous question once you submit your answer.

6. Suggestions for internet connection:
6.1. If possible, choose a wired internet connection over a wireless connection.
6.2. This is an online test and you do not want to take the whole test over again just because of issues with your internet connection.
6.3. If you do lose your internet connection, I recommend that you close your browser and then sign back into eCampus. You should be able to continue the test where you left off.
6.4. Please note that the clock will continue to run, so do not assume that you have lots of time to utilize.
6.5. If the above reset does not work, you will have to retake the whole test.

7. If you have problems, tell me:
7.1. If you have any problems at all, please contact me as soon as possible through email.
7.2. I will be available throughout the day to help you.
7.3. Do not wait 20–30 minutes before contacting me about any problems.
7.4. I want to know immediately so that I can help.
